

ECRI

Employability & Career Readiness Intelligence Executive Institutional Assessment Report

Metropolitan Apex University

Synthetic demonstration institution · ECRI v6.0 · 2026

74.80 / 100

Overall ECRI Position

This demonstration uses the production ECRI scoring architecture with a synthetic institution. All values are illustrative; the calculation is real and reproducible.

1. Executive Institutional Position

The first leadership question: where does the institution stand, and what does the score actually mean?

Headline score 74.80 / 100

The headline score is a weighted aggregation of validated metric performance across 11 dimensions. Evidence confidence is reported separately and is not used as a performance multiplier.

Dimension	Weight	Score	Current Maturity	Required	Gap
D01 · Employer Demand Intelligence	8%	78.0	4	3	-1.0
D02 · Employability Capability Framework	8%	72.0	4	3	-1.0
D03 · Industry-Aligned Curriculum	9%	81.0	4	4	+0.0
D04 · Experiential & Practice-Based Learning	10%	67.0	3	4	+1.0
D05 · Career Development Infrastructure	8%	76.0	4	3	-1.0
D06 · Professional & Human Capabilities	9%	74.0	4	3	-1.0
D07 · Digital & AI-Era Work Readiness	8%	79.0	4	3	-1.0
D08 · Portfolio & Capability Signalling	8%	69.0	3	3	+0.0
D09 · Employer Engagement & Recruitment Ecosystem	10%	77.0	4	4	+0.0
D10 · Employment Outcome Quality	12%	73.0	3	4	+1.0
D11 · Career Adaptability, Lifelong Readiness & Employability Intelligence	10%	77.7	3	3	+0.0

2. What Leadership Needs to Know

01	Strong external relevance foundation Employer demand, curriculum alignment and digital work readiness show relatively strong positions.
02	Practice is the central transformation gap D04 sits below its declared required maturity and should be treated as a system-level priority.
03	Outcome quality needs stronger longitudinal intelligence D10 requires stronger verified progression and quality-of-employment tracking.
04	Capability signalling is uneven D08 shows a gap between capability development and the ability to demonstrate it credibly to employers.
05	ECRI converts findings into sequenced action The roadmap links maturity gaps to evidence, ownership and review horizons.

3. Institutional Context

Context changes what is reasonable to expect; it does not provide an automatic score advantage.

Context factor	Demonstration value
Institution type	Broad multidisciplinary university
Geography	Urban / regional employer ecosystem
Scale	Multi-faculty institution
Mandate	Teaching + research + employability
Assessment scope	11 dimensions / 132 metrics
Core evidence model	10 evidence packets supporting multiple metrics

4. Eleven-Dimension Intelligence Map

Dimension	Weight	Score	Current Maturity	Required	Gap
D01 · Employer Demand Intelligence	8%	78.0	4	3	-1.0
D02 · Employability Capability Framework	8%	72.0	4	3	-1.0
D03 · Industry-Aligned Curriculum	9%	81.0	4	4	+0.0
D04 · Experiential & Practice-Based Learning	10%	67.0	3	4	+1.0
D05 · Career Development Infrastructure	8%	76.0	4	3	-1.0
D06 · Professional & Human Capabilities	9%	74.0	4	3	-1.0
D07 · Digital & AI-Era Work Readiness	8%	79.0	4	3	-1.0
D08 · Portfolio & Capability Signalling	8%	69.0	3	3	+0.0
D09 · Employer Engagement & Recruitment Ecosystem	10%	77.0	4	4	+0.0
D10 · Employment Outcome Quality	12%	73.0	3	4	+1.0
D11 · Career Adaptability, Lifelong Readiness & Employability Intelligence	10%	77.7	3	3	+0.0

5.1 D01 — Employer Demand Intelligence

Performance	Current maturity	Required maturity	Transformation distance
78.0	4	3	-1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.2 D02 — Employability Capability Framework

Performance	Current maturity	Required maturity	Transformation distance
72.0	4	3	-1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.3 D03 — Industry-Aligned Curriculum

Performance	Current maturity	Required maturity	Transformation distance
81.0	4	4	+0.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.4 D04 — Experiential & Practice-Based Learning

Performance	Current maturity	Required maturity	Transformation distance
67.0	3	4	+1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.5 D05 — Career Development Infrastructure

Performance	Current maturity	Required maturity	Transformation distance
76.0	4	3	-1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.6 D06 — Professional & Human Capabilities

Performance	Current maturity	Required maturity	Transformation distance
74.0	4	3	-1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.7 D07 — Digital & AI-Era Work Readiness

Performance	Current maturity	Required maturity	Transformation distance
79.0	4	3	-1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.8 D08 — Portfolio & Capability Signalling

Performance	Current maturity	Required maturity	Transformation distance
69.0	3	3	+0.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.9 D09 — Employer Engagement & Recruitment Ecosystem

Performance	Current maturity	Required maturity	Transformation distance
77.0	4	4	+0.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.10 D10 — Employment Outcome Quality

Performance	Current maturity	Required maturity	Transformation distance
73.0	3	4	+1.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

5.11 D11 — Career Adaptability, Lifelong Readiness & Employability Intelligence

Performance	Current maturity	Required maturity	Transformation distance
77.7	3	3	+0.0 level

Diagnostic interpretation

This dimension is assessed through 12 canonical metrics. The score is performance; maturity is the observed capability state; required maturity is the declared target. They are intentionally not collapsed into one construct.

Illustrative strengths

- Structured ownership exists for the dimension.
- Operating practices are visible in representative areas.
- There is a clear opportunity to strengthen repeatability and institutional integration.

Illustrative transformation signals

- Evidence coverage should be strengthened where claims exceed Level 2.
- Cross-functional integration is the next maturity step.
- Outcome/learning loops should be made visible where relevant.

12 canonical metrics · evidence confidence reported separately · metric-level traceability available in the detailed report.

17. Evidence, Verification & Score Release

ECRI does not use evidence confidence as a score multiplier. Instead, evidence controls whether a maturity claim is supportable and whether a score can be released as final.

- E0 — No usable evidence
- E1 — Self-reported / limited evidence
- E2 — Operating evidence
- E3 — Outcome / corroborated evidence
- E4 — Independent / high-stakes evidence

Release principles: E0/E1 cannot substantiate maturity ≥ 3 ; missing data is not N/A; contradictions require adjudication; high-stakes claims require enhanced verification.
