

AI RESILIENT UNIVERSITY INDEX

Preliminary ARUI Assessment Report

Institutional AI Resilience Assessment · Indicative position based on the current assessment scope

PREPARED FOR

Demonstration University

University · State public university · Mysuru, Karnataka · Established 1962

PRELIMINARY — D01–D03 ASSESSED

SAMPLE REPORT · MOCK DATA

ASSESSMENT ID asm-demo-2026	REPORT ID RPT-ASM-DEMO-2026-0001	ASSESSMENT PERIOD 2026-01-12 to 2026-02-27	METHODOLOGY VERSION ARUI v4 · P0-8 (pre-pilot)
SCORE RUN run-1	ASSESSMENT STATUS Preliminary	GENERATED 2026-03-04	AUDIENCE Vice-Chancellor, Executive Board and Academic Council

REPORT INFORMATION

About this report

This report presents the Preliminary ARUI Assessment for the institution named below. It covers the three domains assessed in the current scope and should be read with the limitations set out at the end.

Institution	Demonstration University
Assessment ID	asm-demo-2026
Report ID	RPT-ASM-DEMO-2026-0001
Report kind	Preliminary
Assessment period	2026-01-12 to 2026-02-27
Submitted	2026-02-27
Assessment status	Preliminary
Methodology version	ARUI v4 · P0-8 (pre-pilot)
Score run	run-1
Template version	report-template 0.1 (sample)
Contributors	Institution Admin: Office of the Registrar; Contributor: Dean, Academic Affairs; Contributor: Director, IT Services
Assessors	Assessor A (lead); Assessor B (second)
Confidentiality	Confidential — prepared for the institution's leadership. Not a certification, ranking or public benchmark.

How to read this report

Current maturity is the level the institution demonstrates today on a 0–5 scale, scored by assessors against domain-specific anchors. Required maturity is the level the institution's own context reasonably calls for; it is derived from mandate, AI exposure, disciplinary consequence and trajectory, and never changes a capability score. Transformation distance is required minus current; it is a diagnostic gap, not a penalty. Evidence confidence describes how well positions are supported and is reported separately from capability. Cross-domain findings are diagnostic signals only.

Assessment coverage: 3 of 11 domains. Positions for the eight remaining domains are not assessed and no indicative score is given for them. Preliminary results are not a certification.

Contents

- 1. Executive summary
- 2. Institutional context and profile
- 3. Assessment scope and coverage
- 4. Overall ARUI position
- 5. Domain results — D01, D02, D03
- 6. Cross-domain dependencies and contradictions
- 7. Validation, evidence and verification status
- 8. Assessor observations and priority areas
- 9. Recommended actions — 90 days, 12 months, longer term
- 10. Methodology note, limitations and reassessment

1 · EXECUTIVE SUMMARY

Clear strategic intent; institutional response capacity and its evidence lag behind.

Across the three assessed domains, Demonstration University articulates AI as a strategic priority with senior ownership. The governance mechanisms, human capability development and documentary evidence that would carry that intent through the institution are less developed. The largest distance between current and required maturity is in governance and responsible AI; the least-evidenced position is in human capability, where several claims remain unvalidated pending evidence.

Narrative sections of this report are assessor-authored. The engine supplies positions, flags and diagnostics; it does not write prose.

ASSESSMENT COVERAGE

Domain positions at a glance

DOMAIN	CURRENT	REQUIRED	DISTANCE	DOMAIN SCORE	STATUS
D01 · Institutional Strategy, Foresight & AI Direction	3 · Structured	4 · Integrated	+1	62 / 100	DEVELOPING
D02 · Governance, Responsible AI & Institutional Risk	2 · Emerging	4 · Integrated	+2	49 / 100	PRIORITY
D03 · Human Capability, Cognitive Readiness & AI-Ready Education	2 · Emerging	3 · Structured	+1	52 / 100	PRIORITY

Key strengths

FINDING	DOMAINS	EVIDENCE
Articulated strategic intent AI is named within the current strategic plan with senior ownership, providing a mandate other areas can draw on.	D01	Evidenced
Published academic integrity guidance Institution-wide guidance on generative AI in assessment exists and is publicly accessible.	D02	Evidenced
A defined home for AI questions A cross-institutional AI working group with terms of reference gives AI-related questions an identifiable owner.	D01, D02	Partially evidenced

Priority gaps

FINDING	DOMAINS	EVIDENCE
Governance depends on a single working group Institutional response to consequential AI questions routes through one advisory group without a defined decision right or escalation pathway.	D02	Evidenced
Capability development is largely self-directed Development opportunities exist but are optional and uneven; no institution-wide capability baseline is in place.	D03	Partially evidenced

FINDING	DOMAINS	EVIDENCE
Response claims are thinly evidenced Claims about how the institution responds to new AI questions are not yet supported by documented decision or review records.	D01, D02	Unvalidated

2 · INSTITUTIONAL CONTEXT AND PROFILE

The institution as it described itself

Context shapes what the assessment explores, how deeply, what evidence is proportionate and what maturity is reasonable to expect. It never gives an institution a score advantage or disadvantage.

Identity

Institution name	Demonstration University
Institution type	University
Governance type	State public university
Year established	1962

Location

State	Karnataka
District	Mysuru
Location	Urban

Scale and academic character

Students	18,400
Faculty	1,120
Active programmes	142
UG programmes	61
PG programmes	68
Doctoral programmes	13
Major disciplines	Engineering & technology; Sciences; Commerce & management; Humanities & social sciences; Law
Research intensity	Balanced
Institutional mandate	Broad teaching + research

Resources and engagement

Annual expenditure band	Band C (sample) (Band boundaries are a pending methodology decision)
Technology/IT expenditure band	Band B (sample) (Band boundaries are a pending methodology decision)
Research funding band	Band B (sample) (Band boundaries are a pending methodology decision)
Industry engagement	Structured partnerships in selected faculties
Innovation/incubation ecosystem	Incubation centre established

Student profile

Student catchment	District; State; Other Indian states
Student mobility pattern	Commuter; Hostel-resident
Residential model	Mixed
International exposure	Limited

AI and change context

AI exposure	Moderate
Disciplinary consequence	High
Institutional trajectory	Transforming

Profile completeness: complete. A complete profile precedes scoring. Expenditure and funding band boundaries, and the option lists for several profile fields, are pending methodology decisions; values shown are the institution's selections from provisional lists.

3 · ASSESSMENT SCOPE AND COVERAGE

Assessment coverage: 3 of 11 domains

The AI Resilient University Index has eleven domains. This assessment covers the first three; the remaining eight are listed so that leadership can see the full architecture and what a complete assessment would add.

CODE	DOMAIN	METRICS	STATUS IN THIS REPORT
D01	Institutional Strategy, Foresight & AI Direction	10	Assessed
D02	Governance, Responsible AI & Institutional Risk	14	Assessed
D03	Human Capability, Cognitive Readiness & AI-Ready Education	17	Assessed
D04	Curriculum & Programme Future Resilience	—	Not yet assessed
D05	Faculty Capability & Academic Workforce Transformation	—	Not yet assessed
D06	Student Capability, Agency & Future Readiness	—	Not yet assessed
D07	Learning, Assessment & Evidence of Capability	—	Not yet assessed
D08	Digital, Data & Institutional Intelligence	—	Not yet assessed
D09	Employability, Industry & Economic Relevance	—	Not yet assessed
D10	Research, Innovation & Knowledge Creation	—	Not yet assessed
D11	Institutional Adaptability & AI Resilience	—	Not yet assessed

DOMAINS ASSESSED 3 of 11 D01, D02, D03	METRICS IN SCOPE 41 of 143 10 + 14 + 17	WEIGHTED DOMAIN COVERAGE 0.34 sum of assessed domain weights
---	--	---

Domain weights are provisional pending methodology validation. Weighted domain coverage is reported so that any future overall figure can be read against the share of the index it represents.

4 · OVERALL ARUI POSITION

Where the institution stands, domain by domain

Domain positions are shown individually. Transformation distance is the gap between the maturity the institution's context requires and the maturity currently demonstrated; it is diagnostic and is not a penalty.

An overall ARUI /100 figure is not reported at partial coverage (3 of 11 domains). The presentation rule for partial-scope results is a pending methodology decision (MD-08).

Reading transformation distance

A distance of +2 means the institution's context calls for a maturity two levels above the level it currently demonstrates. Distance directs attention and sequencing; it does not lower any score. Where required maturity could not be derived, the methodology's default level applies and is marked as such in the domain section.

5.1 · DOMAIN RESULT

EVIDENCE CONFIDENCE

0.66

coverage 60%

Metrics: 10 in domain · 10 applicable · 10 scored · 0 not applicable (accepted) · 0 incomplete · 1 review flag(s). Evidence levels across scored metrics: E0 1 · E1 2 · E2 4 · E3 3 · E4 0

Capability positions

CAPABILITY	SCORE	STATUS	EVIDENCE
Strategic AI Integration	72 / 100	DEVELOPING	E3
Future Foresight Maturity	54 / 100	PRIORITY	E2
Strategic Translation	60 / 100	DEVELOPING	E2
Programme Future-Review Coverage	58 / 100	PRIORITY	E2
Strategic Experimentation	66 / 100	DEVELOPING	E3
Resource Alignment	52 / 100	PRIORITY	E1
Institutional Learning Rate	74 / 100	DEVELOPING	E3

Capability labels are the domain's derived outputs. Individual metric identities are held in the assessor record and are not printed in the institution copy.

Strengths

FINDING	DOMAINS	EVIDENCE
Senior ownership of AI direction AI direction is owned at Pro-Vice-Chancellor level and appears in the strategic plan.	D01	Evidenced
Pilots are evaluated before scaling Recent AI pilots have written evaluations and at least one was stopped after evaluation.	D01	Evidenced

Gaps

FINDING	DOMAINS	EVIDENCE
Programme reviews rarely consider AI implications Fewer than half of programmes reviewed in the last three years recorded AI or future-of-work implications.	D01	Evidenced
Resource movement does not yet follow stated priority Budget re-allocation towards AI priorities is asserted but not evidenced.	D01	Unvalidated

Claims awaiting evidence

CLAIM	EVIDENCE THAT WOULD VALIDATE IT
Resources have been re-allocated to AI-related strategic priorities	Budget or investment record showing movement between planning cycles
A structured horizon-scanning mechanism operates annually	Foresight report or committee record from the last 24 months

Missing evidence does not automatically reduce capability. Where the methodology requires evidence for a particular claim, that claim may remain unvalidated until sufficient evidence is available.

Institutional data supplied

REF	ITEM	VALUE	STATE
D01-D01	Active programmes	142	Provided
D01-D02	Programmes reviewed in last 3 years	96	Provided
D01-D03	Programmes where AI/future implications considered	41	Provided
D01-D04	Programmes modified due to AI/employment changes	12	Provided
D01-D05	Material AI/future strategic decisions in last 18 months	4	Provided
D01-D06	AI pilots conducted in last 24 months	7	Provided
D01-D07	AI pilots formally evaluated	5	Provided
D01-D08	AI pilots scaled	2	Provided
D01-D09	AI pilots stopped after evaluation	1	Provided

Not sure, not provided and not applicable are distinct states. None of them is treated as zero.

Assessor observation

Strategic language is mature and consistent across documents. The institution should expect the next assessment to test whether stated priorities are visible in resource movement and programme review records.

5.2 · DOMAIN RESULT

D02 – Governance, Responsible AI & Institutional Risk

CURRENT MATURITY
2
Emerging

REQUIRED MATURITY

+2
required – current · diagnostic

DOMAIN SCORE
49
Priority

EVIDENCE CONFIDENCE
0.57
coverage 45%

Metrics: 14 in domain · 13 applicable · 13 scored · 1 not applicable (accepted) · 0 incomplete · 2 review flag(s). Evidence levels across scored metrics: E0 3 · E1 3 · E2 5 · E3 2 · E4 0

Capability positions

CAPABILITY	SCORE	STATUS	EVIDENCE
Governance Ownership	44 / 100	PRIORITY	E2
Responsible AI Maturity	46 / 100	PRIORITY	E1
Data Governance Readiness	58 / 100	PRIORITY	E2
Academic Integrity Governance	70 / 100	DEVELOPING	E3
Human Accountability	40 / 100	PRIORITY	E1
Incident Responsiveness	36 / 100	PRIORITY	E0
Governance Effectiveness	48 / 100	PRIORITY	E2

Capability labels are the domain's derived outputs. Individual metric identities are held in the assessor record and are not printed in the institution copy.

Strengths

FINDING	DOMAINS	EVIDENCE
Academic integrity guidance is institution-wide Published guidance covers permitted and prohibited AI use in assessment, with a review date.	D02	Evidenced

Gaps

FINDING	DOMAINS	EVIDENCE
No defined decision right for consequential AI Approval of AI tools that affect students is not assigned to a named role or body.	D02	Evidenced
Incident pathway is untested No documented process exists for detecting and responding to a harmful AI outcome; the described response is individual-led.	D02	Evidenced
Human override is not named for consequential use cases Where AI informs admissions or progression, no named reviewer or override step is recorded.	D02	Partially evidenced

Claims awaiting evidence

CLAIM	EVIDENCE THAT WOULD VALIDATE IT
All tools processing student data have been privacy-reviewed	Data-protection review records for the approved tool inventory
Governance policies were reviewed in the last 12 months	Committee minutes or version history showing review and change
Vendor due diligence is applied to AI tools	Due-diligence record for the three most-used tools

Missing evidence does not automatically reduce capability. Where the methodology requires evidence for a particular claim, that claim may remain unvalidated until sufficient evidence is available.

Institutional data supplied

REF	ITEM	VALUE	STATE
D02-D01	Approved AI tools	9	Provided
D02-D02	Approved tools processing personal/student data	5	Provided
D02-D03	Data/privacy reviewed tools	—	Not sure
D02-D04	Consequential AI use cases with named human override	1	Provided
D02-D05	Approved AI governance policies/guidelines	2	Provided
D02-D06	Governance policies reviewed in last 12 months	1	Provided

Not sure, not provided and not applicable are distinct states. None of them is treated as zero.

Assessor observation

Governance exists on paper for academic integrity but not for AI decision rights, risk or incidents. One metric was accepted as not applicable (research AI governance) on the basis of the current research portfolio; this should be revisited if the doctoral programme grows.

5.3 · DOMAIN RESULT

D03 – Human Capability, Cognitive Readiness & AI-Ready Education

CURRENT MATURITY
2

0.44
coverage 25%

Metrics: 17 in domain · 16 applicable · 16 scored · 1 not applicable (accepted) · 0 incomplete · 3 review flag(s). Evidence levels across scored metrics: E0 6 · E1 5 · E2 4 · E3 1 · E4 0

Capability positions

CAPABILITY	SCORE	STATUS	EVIDENCE
Human Capability Development	56 / 100	PRIORITY	E2
Capability Demonstration	50 / 100	PRIORITY	E1
Assessment Validity	54 / 100	PRIORITY	E2
AI Verification Capability	42 / 100	PRIORITY	E0
Transfer Capability	48 / 100	PRIORITY	E1
Non-Technical AI Capability	46 / 100	PRIORITY	E1
Intellectual Agency	60 / 100	DEVELOPING	E2

Capability labels are the domain's derived outputs. Individual metric identities are held in the assessor record and are not printed in the institution copy.

Strengths

FINDING	DOMAINS	EVIDENCE
Project and case learning is widespread A majority of programmes use project, case or practical learning as a normal mode.	D03	Partially evidenced

Gaps

FINDING	DOMAINS	EVIDENCE
Few programmes define graduate capabilities explicitly Explicit graduate capability frameworks exist in a minority of programmes.	D03	Evidenced
Verification of AI output is not an assessed activity No programme could evidence an assessment activity in which students challenge or verify AI output.	D03	Unvalidated

Claims awaiting evidence

CLAIM	EVIDENCE THAT WOULD VALIDATE IT
Students routinely verify and contextualise AI output in coursework	Assessment brief and rubric sample from at least two programmes
Non-technical programmes include AI capability outcomes	Programme specification extracts for the named programmes
Competency outcome data is collected	Anonymised competency data extract or outcome report
Interdisciplinary AI learning is available to all faculties	Module catalogue or enrolment data
Faculty development in AI-era pedagogy is institution-wide	Participation record by faculty

Missing evidence does not automatically reduce capability. Where the methodology requires evidence for a particular claim, that claim may remain unvalidated until sufficient evidence is available.

Institutional data supplied

REF	ITEM	VALUE	STATE
D03-D01	Programmes with explicit graduate capability framework	38	Provided
D03-D02	Programmes using project/case/practical learning	97	Provided
D03-D03	Programmes requiring unfamiliar/ambiguous problem solving	—	Not provided
D03-D04	Programmes with explicit AI verification activity	0	Provided
D03-D05	Programmes with interdisciplinary AI learning	6	Provided
D03-D06	Non-technical programmes with explicit AI capability outcomes	4	Provided
D03-D07	Students with competency outcome data	—	Not provided
D03-D08	Students meeting defined competency threshold	—	Not applicable accepted

Not sure, not provided and not applicable are distinct states. None of them is treated as zero.

Assessor observation

This domain carries the lowest evidence confidence in the assessment. Several positions may change materially once assessment samples are supplied; the institution is encouraged to treat the D03 position as provisional in the strongest sense.

6 · CROSS-DOMAIN DEPENDENCIES AND CONTRADICTIONS

How the assessed domains relate to one another

Cross-domain intelligence tests whether linked capabilities support or contradict each other. These findings prioritise verification and leadership attention. They have no direct score effect.

Rules computable within the assessed scope: CD01 (D01 → D03), CD02 (D01 → D02). 23 further rules require domains not yet assessed and are recorded as incomplete.

Contradictions

RULE	LINK	INTERPRETATION	RECOMMENDED VERIFICATION
CD01 HIGH	D01 Institutional Learning Rate → D03 AI Verification Capability	The institution reports that strategy changes after evidence, yet no programme evidences students verifying AI output. Strategic learning has not reached teaching practice.	Sample two programme reviews for changes to assessment design following AI-related decisions.

Dependency gaps

RULE	LINK	INTERPRETATION	RECOMMENDED VERIFICATION
CD02 MEDIUM	D01 Strategic AI Integration → D02 Governance Ownership	Strategic integration is developing while governance ownership remains a priority gap: strategy is ahead of the decision architecture that would carry it.	Confirm whether any board- or council-level decision on AI has passed through a defined approval pathway.

Institutional coherence diagnostics

DIAGNOSTIC	STATE	NOTE
Strategy-to-Execution Coherence	Attention	CD01–CD02 triggered within the assessed scope.
Governance-to-Practice Coherence	Incomplete	CD05–CD07 require D04–D07; not assessed.
Capability-to-Proof Coherence	Incomplete	CD08–CD12 require D05–D07; not assessed.

Score effect: none. A contradiction or dependency gap never adjusts a metric, domain or overall position. It tells assessors where to look and leadership where coherence is at risk.

7 · VALIDATION, EVIDENCE AND VERIFICATION STATUS

How well the positions are supported

Evidence strengthens confidence in your position. Missing evidence does not automatically reduce capability. Where the methodology requires evidence for a particular claim, that claim may remain unvalidated until sufficient evidence is available.

EVIDENCE ITEMS SUBMITTED

11

core target 8–12

ACCEPTED

7

2 under review · 2 returned

CLAIMS AWAITING EVIDENCE

10

across D01–D03

VERIFICATION

Not started

independent verification follows

Validation flags

DOMAIN	FLAG	COUNT	NOTE
D01	REVIEW	1	One high score supported only by self-declaration (E0); assessor review scheduled.
D02	CORROBORATION REVIEW	1	Academic integrity governance scored ≥80 on a single non-independent source.
D02	N/A	1	Research AI governance accepted as not applicable with documented rationale.
D03	REVIEW	3	Three positions rest on E0 evidence and remain provisional.

Not-applicable decisions

DOMAIN	ITEM	DOCUMENTED REASON	DECISION
D02	Research AI governance	No externally funded AI research and no doctoral programme using AI methods at the time of assessment.	Accepted
D03	Students meeting defined competency threshold	No competency threshold has been defined; the ratio has no denominator.	Accepted

Assessor calibration: 8 metrics were double-scored blind; 7 agreed within one level and 1 went to adjudication. Assessor overrides recorded: 0.

Evidence register

EVIDENCE ITEM	TYPE	PERIOD	DOMAINS	STATUS	LEVEL	TEMPORAL VALIDITY
Strategic Plan 2024–2029	Strategy document	2024-06 – 2029-05	D01	Accepted	E3	Within window
AI Working Group terms of reference	Governance record	2025-02	D01, D02	Accepted	E2	Within window
Generative AI in assessment — institutional guidance	Policy / guidance	2025-08	D02	Accepted	E3	Within window
Pilot evaluation: AI feedback assistant	Evaluation report	2025-11	D01	Accepted	E3	Within window
Approved AI tool register	Operational record	2026-01	D02	Under review	—	Not assessed
Programme review template (2023)	Process document	2023-03	D01	Returned	E1	Outside window

EVIDENCE ITEM	TYPE	PERIOD	DOMAINS	STATUS	LEVEL	TEMPORAL VALIDITY
Faculty development calendar 2025–26	Operational record	2025-07 – 2026-06	D03	Accepted	E2	Within window
Graduate attributes framework (School of Engineering)	Curriculum document	2024-09	D03	Accepted	E2	Within window
Assessment brief sample — Business Analytics	Assessment sample	2025-10	D03	Under review	—	Not assessed
Board minutes extract — AI investment decision	Governance record	2025-12	D01, D02	Accepted	E3	Within window
Data protection review checklist	Process document	2022-05	D02	Returned	E1	Outside window

Evidence levels E0–E4 express the strength of support for a claim. Items outside the methodology's temporal validity window are returned and do not support current-period claims.

8 · ASSESSOR OBSERVATIONS AND PRIORITY AREAS

What the assessors want leadership to notice

- Whole assessment — The institution engaged openly and supplied evidence promptly. Several claims were withdrawn or narrowed during review, which is itself a positive signal of institutional honesty.

Assessor A · 2026-03-03
- D02 — The absence of a named approval authority for student-facing AI tools is the single most consequential finding in this assessment.

Assessor A · 2026-03-03
- D03 — Evidence requested on 2026-02-20 for assessment samples remains outstanding; the D03 position should be re-read once it arrives.

Assessor B · 2026-03-04

Priority areas

#	AREA	DOMAIN	WHY IT IS A PRIORITY
1	AI decision rights and escalation	D02	Largest transformation distance in the assessed domains; a required-maturity gap of two levels.
2	Verification and capability evidence in teaching	D03	Lowest evidence confidence; several claims unvalidated.
3	Programme review coverage of AI implications	D01	Coverage below half of reviewed programmes; the strategic intent is not yet reaching the portfolio.

Priorities and actions are assessor-authored professional recommendations informed by the assessed positions. They are not generated by the scoring engine and carry no score effect.

9 · RECOMMENDED ACTIONS

A sequenced direction of travel

Actions are grouped by horizon. Each is linked to the gap it addresses so that progress can be read back against the assessment at reassessment.

NEXT 90 DAYS			
ACTION	DOMAINS	LINKED GAP	SUGGESTED OWNER
Assign a named approval authority for student-facing AI tools Designate the body or role that approves AI tools affecting students, with a documented escalation route to the Executive.	D02	No defined decision right for consequential AI	Registrar / Academic Council
Supply outstanding assessment samples Provide assessment briefs and rubrics from two programmes showing students verifying or challenging AI output, so the D03 position can be validated.	D03	Verification of AI output is not an assessed activity	Dean, Academic Affairs
Publish the approved AI tool register with data-processing status Complete the privacy-review column for the nine approved tools.	D02	All tools processing student data have been privacy-reviewed (unvalidated)	Director, IT Services
WITHIN 12 MONTHS			
ACTION	DOMAINS	LINKED GAP	SUGGESTED OWNER
Add AI and future-of-work implications to the programme review template Make the consideration of AI implications a required section and report coverage annually.	D01	Programme reviews rarely consider AI implications	Quality Assurance Cell
Define and test an AI incident pathway Document detection, response, escalation and learning steps; run one table-top exercise.	D02	Incident pathway is untested	Risk Committee
Extend graduate capability frameworks beyond Engineering Adopt explicit graduate capability statements in at least two further schools.	D03	Few programmes define graduate capabilities explicitly	Deans
LONGER-TERM DIRECTION			
ACTION	DOMAINS	LINKED GAP	SUGGESTED OWNER
Move from working-group governance to institutional decision architecture Embed AI decision rights, risk and human oversight in standing governance rather than an advisory group.	D01, D02	Governance depends on a single working group	Executive Board
Complete the remaining eight ARUI domains Extend the assessment to D04–D11 so that curriculum, faculty, student, assessment, digital, employability, research and adaptability positions are known.	D04, D05, D06, D07, D08, D09, D10, D11	—	Institution Admin

About the ARUI methodology · ARUI v4 · P0-8 (pre-pilot)

The AI Resilient University Index assesses institutional AI resilience across eleven domains and 143 metrics. Each metric is scored by trained assessors against domain-specific maturity anchors on three constructs: maturity (how developed the capability is), implementation depth (how far it operates in practice) and outcome (what it has produced), together with an evidence level.

Required maturity is derived from the institution's context — mandate, AI exposure, disciplinary consequence and trajectory — and expresses the maturity the institution's situation reasonably calls for. Context never adds or removes points from a capability score. Transformation distance is the difference between required and current maturity and is diagnostic.

Evidence confidence is reported separately from capability and never multiplies a score. Cross-domain findings are diagnostic signals that guide verification and never adjust a position.

Scoring in brief

- Capability positions are assessor-scored, not computed from questionnaire answers.
- Domain positions average the applicable metric scores; not-applicable metrics are excluded only where inapplicability was documented and accepted.
- Status bands: Strong, Developing, Priority.
- Unknown, not sure, not answered and not applicable are recorded as distinct states; none of them is treated as zero.

Maturity scale

LEVEL	LABEL	MEANING
0	Absent	No recognisable capability.
1	Reactive	Capability appears only in response to events.
2	Emerging	Capability is forming in parts of the institution.
3	Structured	Capability is defined, owned and repeatable.
4	Integrated	Capability operates across the institution and connects to other capabilities.
5	Adaptive	Capability learns and changes ahead of events.

Limitations and provisional status

- This is a Preliminary ARUI Assessment covering 3 of 11 domains (D01–D03). Positions for D04–D11 are not assessed and no indicative score is given for them.
- Preliminary results are not a certification. Independent verification is a separate, later process and has not started.
- Evidence confidence bands and an overall ARUI /100 figure at partial coverage await methodology decisions and are therefore not reported.
- Several positions, particularly in D03, rest on self-declared evidence and may change materially once requested evidence is supplied.
- The methodology version used is pre-pilot. Public benchmark status is blocked and the assessment is not a ranking.

Reassessment

Recommended window. Re-read the D03 position on receipt of outstanding evidence; full reassessment of D01–D03 in 12–18 months or on a material governance change.

Triggers for earlier reassessment

- Adoption of a new institutional AI policy or governance structure

- Introduction of AI tools into admissions, progression or assessment decisions
- Significant growth in doctoral or externally funded research activity
- Completion of the remaining eight domains

Next steps

1. Institution supplies outstanding evidence (assessment samples, tool register privacy status).
2. Assessors complete verification review for flagged positions.
3. A verification score run replaces this preliminary report.
4. Institution decides whether to extend the assessment to D04–D11.

Remaining domains for a full-scope assessment

D04 Curriculum & Programme Future Resilience · D05 Faculty Capability & Academic Workforce Transformation · D06 Student Capability, Agency & Future Readiness · D07 Learning, Assessment & Evidence of Capability · D08 Digital, Data & Institutional Intelligence · D09 Employability, Industry & Economic Relevance · D10 Research, Innovation & Knowledge Creation · D11 Institutional Adaptability & AI Resilience

This document is a Preliminary ARUI Assessment Report generated from a single score run under the methodology version stated. It is not a certification, ranking or public benchmark. Assessment fees pay for assessment work and never influence score, rank, verification or recognition.
