

ECRI

Employability & Career Readiness Index

Sample Executive Assessment Report

Illustrative institution: Metropolitan Apex University

Assessment cycle: 2026 Baseline **Methodology:** ECRI v6.0

This sample demonstrates the structure and decision-usefulness of an ECRI institutional assessment. All institution names, scores, findings and evidence references in this document are illustrative.

1. Executive Institutional Position

The ECRI assessment presents an institution-wide view of graduate employability, employer alignment, work-integrated learning, career infrastructure, capability signalling and employment outcomes.

ECRI POSITION	74.8 / 100
DIMENSIONS ASSESSED	11 / 11
METRICS IN SCOPE	132
CORE EVIDENCE SET	10 items

Leadership questions addressed

- Where is the institution demonstrating employability capability today?
- Which dimensions show the strongest institutional structure and evidence?
- Where are capability gaps or weak outcome signals concentrated?
- Which institutional dependencies should leadership examine?
- What should be addressed first, next and over the longer term?

2. Eleven-Dimension Scoreboard

Code	Dimension	Illustrative position
D01	Employer Demand Intelligence	78/100
D02	Employability Capability Framework	72/100
D03	Industry-Aligned Curriculum	81/100
D04	Experiential & Practice-Based Learning	67/100
D05	Career Development Infrastructure	76/100
D06	Professional & Human Capabilities	74/100
D07	Digital & AI-Era Work Readiness	71/100
D08	Portfolio & Capability Signalling	69/100
D09	Employer Engagement & Recruitment Ecosystem	77/100
D10	Employment Outcome Quality	73/100
D11	Career Adaptability & Lifelong Readiness	70/100

Scores shown here are illustrative sample values only. A production report is generated from the canonical assessment result.

3. Detailed Dimension Insight — D04

Experiential & Practice-Based Learning

Illustrative position: 67 / 100

Observed strengths

- Credit-bearing internship structures are established in major professional programmes.
- Live projects and employer-linked capstones are available across selected schools.
- A central process exists for recording internship participation.

Illustrative gaps

- Work-integrated learning is less consistently structured outside professional programmes.
- Employer feedback is not captured consistently across placements.
- Outcome evidence is fragmented between departments and the central career function.

Leadership implication: move from placement activity tracking toward institution-wide, evidence-backed work-integrated learning design and outcome review.

4. Transformation Gap & Roadmap

Horizon	Illustrative action	Linked dimensions
0–90 days	Create a common WIL evidence and employer-feedback template.	D04, D09
3–12 months	Extend structured career pathways and capability portfolios across schools.	D02, D05, D08
12–24 months	Build longitudinal graduate outcome intelligence and alumni career tracking.	D10, D11

Roadmap actions in a production report are linked to the institution's assessed gaps and ownership context.

5. Evidence & Verification View

- **Core evidence philosophy:** a small representative evidence set can support multiple metrics.
- **Evidence states:** submitted, under review, reviewed and corroborated are distinct.
- **Verification:** assessor review is recorded separately from institutional self-declaration.
- **Traceability:** evidence-to-metric links are retained in the assessment record.

Illustrative core evidence set

- Employer advisory / industry engagement record
- Programme capability or graduate-attribute framework
- Curriculum review record
- WIL / internship operating evidence
- Career-services operating record
- Graduate outcome / placement evidence
- Employer feedback or recruitment evidence
- Student capability portfolio example
- Alumni career trajectory evidence
- Institutional employability strategy or annual review

6. Public Institutional Profile Preview

A production assessment can publish an institution-facing profile derived from the same canonical report payload. The public view is intentionally concise and does not disclose internal scoring mechanics, evidence rules or proprietary methodology.

Institution	Metropolitan Apex University
Assessment	ECRI 2026 Baseline
Overall position	74.8 / 100 (illustrative)
Dimensions	11
Metrics	132
Evidence	10 core items
Methodology	ECRI v6.0

7. Methodology & Status Note

ECRI is an institutional diagnostic and intelligence instrument. The production assessment uses a versioned methodology registry and preserves the assessment cycle and methodology version used for the result.

This sample report is illustrative and is not an institutional certification, ranking or independent verification statement. Production results are generated only after the institution completes the applicable assessment workflow and assessor review.
